DETAILED ACTION

1. Claims 1-19 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4-6, 8, 11, 13, 14 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurobe et al. (USP 2002/0131350; hereafter Kurobe) as set forth in the last Office Action.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7, 9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurobe et al. (USP 2002/0131350; hereafter Kurobe) as set forth in the last Office Action.

Allowable Subject Matter

6. Claims 2, 3, 10, 12, 15, 16 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. See Office Action mailed 2/21/07 for details of the objection.

Response to Arguments

7. Applicant's arguments filed 5/21/07 have been fully considered but they are not persuasive.

Applicant argues "the recording power is always reduced when the optimum recording power exceeds the preset threshold value since Kurobe does not provide the choice of not changing the optimum recording power". However, Examiner finds the argument not persuasive. Kurobe teaches that when the optimum writing power for certain speed (i.e., writing speed 12X) exceeds the maximum laser power, the CPU only reduces the writing speed, and does not change the laser power even though it exceeds the maximum laser power (see para. [0141]; writing speed 12X is being reduced to writing speed 8X). Therefore, Kurobe does provide a choice of not changing the optimum recording power. Accordingly, claims 1 and other similar claims are not patentable over Kurobe.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2627

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
